Do you have any comments, constructive criticism, or other feedback for your instructor?

		Count
Do you have any comments, constructive criticism, or other feedback for your instructor?	I know you probably spent a lot of time putting together the homework, but I feel like a better homework would be giving us important functions (by, apply, aggregate, etc) and having us use them extensively, perhaps applied to the big finance data set you gave us. The questions wouldn't need to be particularly useful, but should comprehensively test our ability to use the functions. Then you could have us input single number answers into Glow and there wouldn't be a problem there. Otherwise I really enjoyed learning from you.	1
